What is Lean Manufacturing?

Lean manufacturing or lean production is a series of processes and methods for the elimination of waste within a manufacturing system.

The lean manufacturing system forms a constant and never-ending effort to reduce waste in all areas to operate more efficiently.

The ultimate goal of 'lean' is to allow your organisation to constantly improve its cost effectiveness and, increasingly, offer more value to the end user.

Here at Hardy Signs Limited we supply a wide range of solutions to aid companies in their Lean Manufacturing processes.

Tool Stations & Shadow Boards

Shadow boards and equipment storage boards are used in the manufacturing and service industries.

Shadow boards organise the workplace where tools and equipment are stored in appropriate locations close to the work area to ultimately create a safer, more efficient, environment.

They are bespoke and tailor made to a specific size and function which conforms to Lean Manufacturing principles.

Hardy Signs will assess the equipment and given space to design a custom solution for your manufacturing environment.

lity • Sweep • Standardise • Self Discipline

Visual Management & Accessories

Our quality visual management and performance boards create visual cue to reinforce your visual identity and key performance communication.

Our experienced team will work with you to create displays that are easy to access and update.

The displays can incorporate a vast array of visual solutions and accessories including;

- Wallpaper Print
- Acrylic Document Holders
- Dry Wipe Lamination & Markers
- Magnetic Storage & Display Folders
- PPE and Health & Safety Equipment
- Hygiene Equipment and Methods

Health & Safety Solutions

A key element to successful lean manufacturing is compliance with legislation and Health & Safety laws.

Hardy Signs offer accessible safe storage mechanisms, keeping the work area clean and tidy.

We have extensive experience in producing health and safety boards as per industry requirement - covering a portfolio of health and safety signs and graphics which include hygiene sensitive, DDA compliant, braille/tactile and way-finding signage.

Talk to us about your specific requirements and we'll be happy to advise to ensure your organisation is fully compliant.

Factory Entrance & PPE

Hardy Signs create bespoke factory entrance and PPE boards that will protect users against health and safety risks at work.

After conducting a complete signage survey we can produce all your PPE boards taking in to account the given space and objectives.

These solutions can include:

- Hazard Warnings
- Designation of multi-use areas
- Entry and Exit Points
- Hygiene Junctions and Dispensers

Factory entrances present an ideal opportunity to communicate your organisation's Lean Manufacturing policy to everyone entering the site.

Bespoke Fabrication

Hardy Signs specialise in manufacturing bespoke fabrication as per your company's specific requirement and functionality.

Once a project is outlined, we can design and manufacture a range of shelves, boards, fixtures and fittings - using only quality materials.
