Guide To Your Brochure

For ease of ordering follow these three simple steps:

- Step 1 - Select the sign you require and choose from the sizes shown.
- Step 2 - Note the alpha-numeric reference number.
- Step 3 - Select the type of material you require.

MA201 200 x 300
MA202 400 x 600

Choose The Right Size

7.7 Metres
At 7.7 metres a sign should be 200 x 300mm

23 Metres
At 23 metres a sign should be 600 x 450mm

15 Metres
At 15 metres a sign should be 400 x 300mm

4.5 Metres
At 4.5 metres a sign should be 100 x 100mm

- Prohibition**
Must not do
- Mandatory**
Action, Must do
- Hazard**
Danger, Warning, Caution
- Safe Condition**
Escape Route, Safety Equipment
- Fire Fighting**

Cigarette Bin

This cigarette bin is manufactured from Aluminium and powder coated for a long lasting outdoor life.

Comes complete with keys and fixings (for wallfixing).

Available for fitting direct to wall or with two rows of post fix channel for post mounting.

Clips are required for post mounting, please see page 142 for options.

code	size (mm)
SS26B	240 x 380

Self Adhesive Vinyl

A flexible PVC, with a high tack adhesive backing. Suitable for interior use. For a good bond ensure the sign is fixed to a smooth, clean & non-porous surface.

Tuff ©

These sub-surface printed signs are virtually indestructable. They do not fade, are anti-corrosive and are highly resistant to deliberate vandalism. These signs can be used again and again.

Rigid PVC plastic

Suitable for interior & exterior use and with a class 1 fire rating. Standard signs are 1mm thick.

Braille

As well as the standard range of DDA signs shown we also offer a bespoke sign service allowing us to make signs to your requirements.

Rigid PVC Plastic / Self Adhesive Backed

All standard safety signs can be produced in 1mm rigid plastic with a self adhesive backing for easy fixing. Please allow 48 hours for delivery when requesting this material.

Acrylic

Reverse applied / printed acrylic signs when used with our chrome locators gives a prestige finish to any surrounding.

Foam PVC

Suitable for interior & exterior use and available in various thicknesses. Typically used for double-sided hanging, projecting and skiphook signs. Lightweight & durable, available in various colours.

Prestige

For interior & exterior use, excellent longevity in normal environmental conditions. Can be used for a prestige look when finished in a Satin Anodised Silver or Brushed Gold effect. Complete with a self adhesive backing.

Dibond

Dibond composite panels comprise of two thin sheets of aluminium enclosing a polyethylene core. Dibond is lightweight, strong and suitable for internal and external locations. It can also be cut and formed as required.

Aluminium Traffic

Class ref 1 and ref 2, reflective 3mm aluminium signs are ideal for site management signs. Can be supplied with channel & clips for post fixing. Comply to BSEN 12899-1 2001.

Gemglow© Photoluminescent

Charged by ambient light these signs immediately illuminate in sudden darkness. An excellent material for Way-finding & Fire equipment signs. Reverse printed for a high quality, durable finish. Complete with a self adhesive backing.

Correx

These fluted lightweight PVC signs are ideal value for temporary, budget site signage.

British Standard Fire Exits

The Safety Signs and Signals Regulations 1996

All fire exit signs on this page conform to the the above, which requires all Safety, Health, Emergency Escape and Fire Equipment signs to include a pictorial symbol. These fire exit signs comply to BS5499 Part 4 and 5, 2000. All employers must comply! It's the law! All signs are available in 1mm rigid plastic, self adhesive vinyl or rigid plastic with self adhesive backing or complete with Bacto-Shield™.

CHROME

BRUSHED CHROME

SWITCHABLE MAINTAINED / NON-MAINTAINED 375 x 195 x 60

Switchable emergency lightboxes can be wired to a switch allowing them to be turned on or off for regular use (switching the unit between maintained and non-maintained operation). In the event of mains power/ circuit failure the lamp in the unit will be powered by its back up battery.

Budget Lighting

These are heavy duty vandal resistant luminaires c/w an opal acrylic cover and die cast aluminium base.

MAINTAINED LU1M 355 x 125
Provides 3hrs of emergency light in the event of mains failure. 8w

NON-MAINTAINED LU1NM 355 x 125
Illuminated only in the event of mains failure battery pack gives 3hrs of emergency lighting. 8w

MODULAR
GRID SIGNS
ON PAGE
82

3 HOUR MAINTAINED LU3M 280 x 130

Sign is permanently illuminated and has a 3 hour battery back up in case of mains failure.

Choose your required legend to go with the product shown.

Siting of luminaires:

All emergency lighting must comply to BS5266 (2005).

Your luminaire should be sited at each exit door, at each intersection of corridors, on each landing and ideally around fire equipment and fire alarm call points.

It is imperative to use these products to ensure escape routes, both primary and secondary, are illuminated to add comfort in state of emergency, or when the power fails.

FIRE EXIT

Fire Action Frames

Our satin-anodised aluminium artemis sign units add an executive finish to your fire action notices. These sign units are 210mm x 297mm (portrait) and include an anti-glare cover and your fire action insert. Artemis signs are also fully interchangeable so can be easily updated as your building requires it.

Fire Equipment Signs

The Fire Precautions (Workplace) Regulations 1997

Non-automatic fire equipment should display safety signs in accordance with The Safety Signs and Signals Regulations 1996. These regulations require the fire fighting equipment to be marked with a permanent sign board in red; Our fire signs conform to DIS3864 Part 1 which requires a white border on all fire signs, and all symbols conform to Pr EN 7010.

STAC2
Fire Safety Log Book

This Fire Precautions Log Book will assist employers with Fire & Safety compliance legislation including the Regulatory (Fire Safety) Reform Act.

No Smoking

Smoking in enclosed places was banned in England on 1st July 2007.

This followed similar bans in Northern Ireland on 30th April and Wales on 2nd April 2007.

These pages contain all the signage you need to conform to this legislation.

From March 2017 drivers in the UK caught using their mobile phones whilst driving will receive 6 penalty points on their license and a penalty notice of £200. Should the police feel it is a particularly extreme example of using a mobile phone behind the wheel; the driver could be taken to court. Here, the maximum fine is £2,500, and guilty drivers could face disqualification. You can also get 3 penalty points if you don't have a full view of the road and traffic ahead or proper control of the vehicle. Enforce your fleet policy on mobile phone use with this range of in-vehicle decals.

The Dangerous Substances and Explosive Atmospheres Regulations (DSEAR) 2002 came into force on the 30th June 2003. (example signs to right)

The DSEAR applies to all dangerous substances, in all businesses with risks from fire or explosions from these substances being used in potentially explosive atmospheres.

As dangerous substances can be found in most workplaces, it is essential that all employers and the self employed comply with this regulation.

Use the signs shown to the right to warn of all potentially explosive situations.

The General Data Protection Regulations (GDPR) came into force in May 2018 and anyone with CCTV must cooperate and use their systems within the new guidelines. Any businesses that have a CCTV system are already obliged to notify people that images of them are being collected. This is called 'personal data'. The most effective method of alerting people is via clearly placed signs within any area captured by the cameras.

Available in Self Adhesive Vinyl, 1mm PVC, 3mm Aluminium and 3mm Foamex plate only or with fixing channel, for post mounting.

Multi-Purpose

A confined space is a place which is substantially enclosed (though not always entirely) and where serious injury can occur from hazardous substances or conditions within the space (e.g. lack of oxygen). Use this range of signs to warn of any potential dangers.

Should you require confined space signs of your own wording, please contact our sales office for advice. All the signs shown conform to ISO 7010

Do you comply with IRR99 Regulation 18?

This legislation places additional requirements to ensure the following:

In CONTROLLED and SUPERVISED areas, suitable and sufficient signs are displayed indicating;

- The type of area (controlled or supervised)
- The nature of the radiation source.
- The risk arising from the source.

The statutory instrument also requires the prohibition of eating, drinking, smoking and the proper maintenance of washing and changing facilities.

Braille

The Disability Discrimination Act Part III 2004

The DDA Part III amendments produced a strict guideline which came into effect on the 1st of October 2004 guaranteeing that equal access must be made to all people using public buildings, including educational establishments.

Signs should be placed at a height suitable for everyone to reach unaided, generally this is recommended to be no lower than 1400mm from the floor and no higher than 1700mm.

Directional signs should be placed at each entry point, as well as signs showing the toilet locations. Fire exit and exit signs should be visible from all locations.

Identification signs (such as door signs) should be located next to the door, in case that door has been left open.

All braille signs available in white on blue or black on white

Industrial Euro Bins

Great all round utility bin stands 650mm high and holds 95 litres. Manufactured from toughened polypropylene available in five colours as shown. Use the colours to differentiate between different zones, cells or departments. Alternatively, use for different kinds of waste. Each bin can be provided with a sign from our standard range, or we can apply the text or graphics of your choice.

Floor Signs

Bring your message right onto the factory floor (literally). These floor signs give maximum impact to your safety policy. Placed directly onto the floor the aggressive adhesive and polycarbonate protective film will give ultimate durability. They should also remain visible under smokeout conditions occupying the gap between the floor and the smoke curtain. Use in conjunction with the surface preparation kit shown on page 90.

General

To relay information, direct, identify or inform, our range of general signs provides the answer. An ideal solution for situations which do not warrant specific safety signage. To project or suspend your general signs use our suspension frames on page 6. These signs are available in our Prestige and Clearview prestige range.

Patient Name Boards

The NHS is committed to providing every patient with same sex accommodation to help safeguard their privacy and dignity when they are often at their most vulnerable. They are also committed to ensuring that patients are treated in clean and pleasant hospital surroundings and that the staff will do all they can to protect people's privacy and dignity. Treating people as individuals, whatever their differences or values, and ensuring that their particular needs are met, is central to the NHS's philosophy of ensuring the very highest levels of privacy, dignity and respect. Use this range of signs to help reinforce your policy.

Dignity Boards

Manufactured from 3mm Dibond with an aluminium hook * these signs are designed to be hung over the curtain rail surrounding a patient bay. The dignity sign acts as a warning to members of staff and the public not to enter whilst the sign is being displayed helping to maintain the patient's privacy. Available in two formats to give maximum contrast against the background they are being hung on.
*Total visible length of sign 600mm

PDRW 200 x 300

PDRB 200 x 300

Self-Adhesive Vinyl

Self-Adhesive Vinyl (SAV) is a flexible and versatile PVC substrate with a permanent adhesive backing. It is best suited to internal locations as it is not as durable externally as other materials such as Correx or Foamex.

Foamex (3, 5 and 10mm)

PVC Foam board is a highly versatile sheet material popular for use in external signage. Available in a choice of thicknesses and preformed in a range of colours, Foamex is a cost effective medium which can be shaped or heat bent.

Correx

Correx is a lightweight, durable and weather proof fluted polypropylene board suitable for indoor and outdoor use. Correx signs are ideally suited for outdoor temporary signage, such as builder's name boards, site boards and estate agent signs.

Tuff

A premium GRP/ Fibreglas substrate. The sub-surface print offers both excellent weather and vandal resistance. These signs produced in 3mm thick GRP can be used time and time again.

1mm Rigid Plastic

White extruded calendered PVC sheeting is ideal for internal and external locations. The smooth white finish is easy to keep clean and offers exceptional rigidity. With a class 1 fire rating and excellent UV resistance 1mm rigid plastic is fully recyclable.

Over-laminate

Over-laminates and protective films offer additional protection and resistance to dirt, pollution, UV degradation and graffiti. All of the materials listed above can be protected with over-laminates to prolong their project lifespan.

Site Safety

These factory printed site safety boards are ideal for enforcing your safety policy.

They can incorporate company logos and colours. We can hold quantities in stock, ready for immediate despatch.

All boards shown are printed on 3mm foam PVC.

Tuff Signs

Produced in rugged, hard wearing GRP, Tuff signs can be used and re-used time and time again. Sub-surface printed for extra durability and with minimal UV fade, they are amongst the most highly vandal resistant signs currently available.

This range incorporates all of our best selling site safety signs, all of which have been updated to conform fully to ISO 7010. If you require a design other than the range illustrated, please contact our sales office.

Photoluminescent Safety Signs

In emergency situations, safe evacuation of premises should be the first priority. Night-time, windowless or smoke filled areas can cause serious reduction in visibility, allowing panic and disorientation to quickly take over.

In smoke filled areas normal emergency safety lighting will become ineffective. GEMGLOW® photoluminescent, glow in the dark signs, provide a very cost effective solution.

Glowing in the dark for upto 7 hours, GEMGLOW® is a PSPA "Class C" rated Product.

Use GEMGLOW® to provide the marking of emergency escape routes, by using a continuous line of wall markers to identify the direction of the escape route, fire exits, doors, stairways and for the location of fire fighting and emergency equipment.

GEMGLOW® signs are a 2 in 1 product - combining the ease of self adhesive fixing with the strength and durability of rigid plastic. Reverse printed and sealed with factory applied self adhesive.

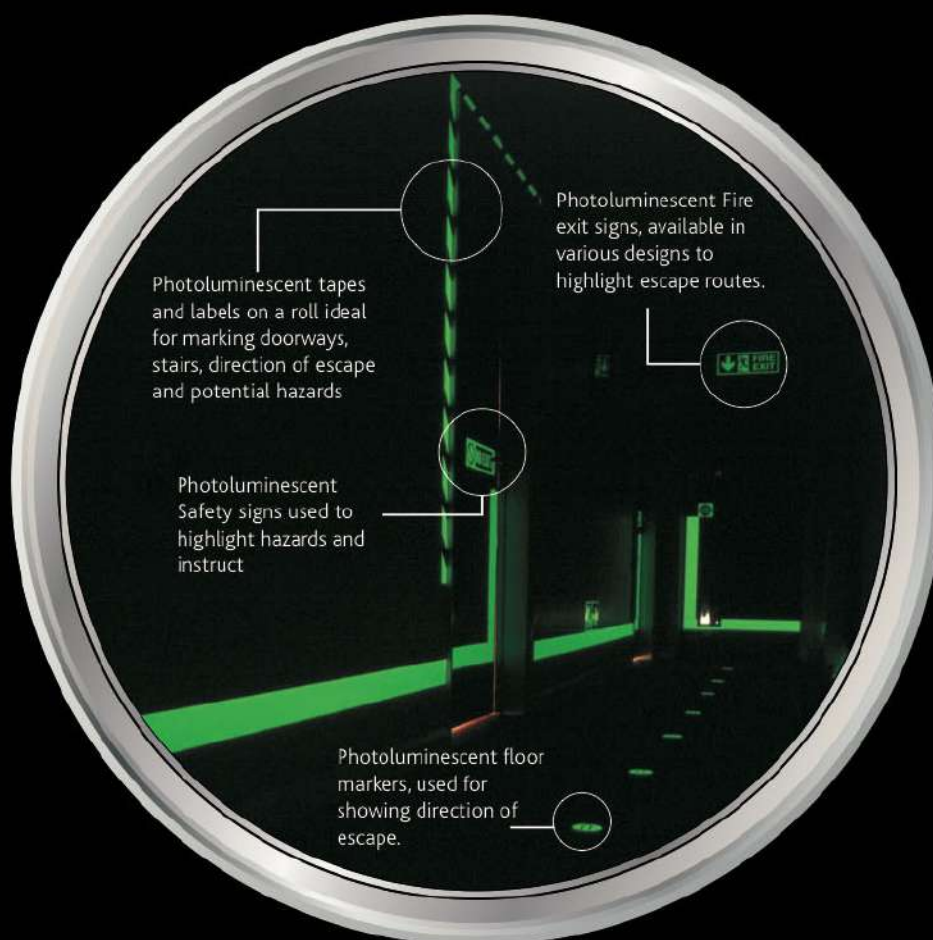

Use GEMGLOW® signs in conjunction with wayfinding systems.

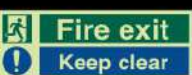

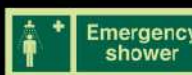

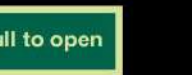

All GEMGLOW® products comply to IEC 60695-2-1/2:1994 ensuring GEMGLOW® is produced on non-flaming substrate.

For any further information or advice contact our sales team .

Modular Grid Signs are a new and innovative form of business signage. Designed to guide you to your destination. Easy to fit with or without a light fitting. Let our team help you to design your own graphics or choose from a wide range of common graphics used to help identify key personnel, key departments and communicating information at the right place helping to maintain health and safety of staff and customers.

Modular Grid Signs are designed to replace an existing suspended ceiling tile on 24mm and 15mm grid systems 600 x 600mm.

Simply remove the existing ceiling tile and put a Modular Grid Sign in its place. You can fit the signs under an existing flat 600 x 600mm modular light fitting or fit them without light fittings.

To fit Modular Grid Signs to the following :

- 1.) In a 600 x 600mm modular metal tile ceiling you will need a modular grid channel frame and hanging brackets
- 2.) For a plasterboard suspended ceiling you will need a modular grid tee frame
- 3.) For a solid ceiling you will need a modular grid channel frame

Use this range of modular grid signs to help identify key areas and departments within your building.

Patent Pending 1620672.4

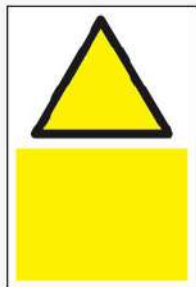

Custom Made Safety Signs

As the need for more specialised signs increases the importance of cost effective quick turnaround specials is vital.

Use the guide shown to create a sign to suit your requirements and we will factory apply the symbol and text of your choice in any quantity, using upper and lower case as standard, please specify if all upper case is required.

Design your own safety signs. Following the 4 easy steps below:

Chose Your type & size of sign.
Example:
Hazard sign
200 x 300
WA300

Chose Your symbol.
Example:
Beware toxic material
symbol
CSW5
WA300 + CSW5

Chose Your text.
Example:
Danger
Risk of toxic gases
WA300 + CSW5+TEXT

Chose Your material.
Example:
Rigid Plastic (R)
WA300 + CSW5 +
TEXT + RIGID

Additional services:

Multi-lingual signs
Simply request a quote with your requirements.

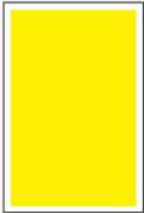

Personalised signs
Help promote your company as a true enforcer of Health and Safety for your visitors.

Custom Made

We are able to manufacture signs on most types of material, whatever the quantity. Shown below is a selection of the most commonly requested materials, for our specially produced signs. Please contact our sales office for further information.

CL - Clearview Prestige Blanks

Manufactured from 6mm clear cast acrylic, graphics are created in frosted vinyl and are reverse applied. Signs are available as a pre-drilled wall mounted sign as shown or as non-drilled projecting sign, as shown in the photo. Each sign comes complete with two chrome fixings. Please specify if you require a wall mounted or projecting sign.

Aluminium Trays

These aluminium trays can be purchased in mill finish or powdercoated, in 6 standard colours. Other colours are available on request.

Choose the text of your choice, including any logo's if required, these can then be applied using the latest technology.

We can also offer trays of different sizes to suit your specific requirements. Trays can also be supplied in more than one piece, particularly suitable for very large signs, please contact our sales office to discuss your requirements further.

code	aluminium tray sign size(mm)
ALT01	300 x 200
ALT03	600 x 450
ALT05	1200 x 450
ALT07	1600 x 800
ALT09	2400 x 1220

*Please note colours shown are for illustration purposes only and may differ from those shown.

GRP Tray Signs

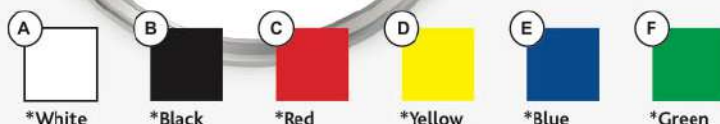

GRP (Glass Fibre Reinforced Plastic) has significant advantages over standard materials. These strong and lightweight signs can be supplied in 6 standard colours.

They are a one piece substrate, ideal as a base for applying graphics of your choice. Other colours and sizes are available on request.

Please quote the stock code and colour code e.g. GRP01B (300 x 200 Moulded GRP sign in black) when ordering.

code	moulded GRP (without channel) size(mm)
GRP01	300 x 200
GRP03	600 x 450
GRP05	1200 x 450
GRP07	1600 x 800
GRP09	2400 x 1220

*Please note colours shown are for illustration purposes only and may differ from those shown.

Angle Signs

The sign shown to the left is manufactured from 3mm aluminium.

Powder coated white ready to accept computer generated text of your choice.

Other colours available on request.

This sign is printed on both sides.

code	3mm aluminium size(mm)
ANS1	200 x 200
ANS2	600 x 400

Display Holders

Use these acrylic holders to compliment your own current scheme, as stand alone items, or use in conjunction with the action centres shown on page 61.

A5DISP

To accept 150 x 200

A4SS

Display holder will accept any 200 x 300 self adhesive sign.

A4PDISP

To accept 300 x 200

Bondings and Fixings

MAST1

Quick and simple to use, sign fix mastic will bond most dry, clean, grease and dust free surfaces without the need for mechanical fixings.

GUN1

Use with MAST1

PRIM1 (1 ltr)

Ideal for preparing most flat surfaces ensuring maximum adhesion.

As supplied with PRIM2

PRIM2

(preparation kit)

Ideal for preparing most flat surfaces ensuring maximum adhesion.

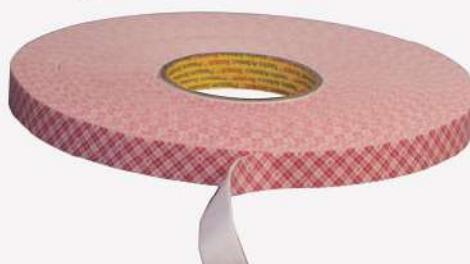

SC10

The above clip is ideal as a fixing method for temporary correx signs. Sign clips sold in packs of 10. Use in conjunction with zip ties.

PP10

Pressure pads ideal for interior fixing of safety signs to clean, dry surfaces. Supplied in strips of 10.

VH81 (30m per roll)

High technology adhesive foam tape. Aggressive grip to flat, dry, clean areas.

NT2

380mm x 7.6mm
Zip-Ties sold in packs of 10.

Aisle Tiles

These self adhesive aisle tiles are ideal for use in warehouses, stores and any other applications where clear location marking may be required.

These contemporary door signs give instant recognition in a unique way, manufactured from Satin Anodised Aluminium. The detail is cut out to show the background through the face. With no graphics these signs are highly vandal resistant yet compliment any location.

Prestige Signs

When searching for something more aesthetically pleasing than a standard white faced safety sign, our Prestige range gives you options in either satin anodised silver or in a brushed gold effect. This prestigious range of signs is manufactured from 1.5mm aluminium and come complete with a factory applied self adhesive backing.

Clearview

Manufactured from 6mm clear cast acrylic, this range is the ultimate in contemporary signage. Graphics are reverse applied to give a smooth and practical glass like finish. Signs are available as a pre-drilled wall mounted sign as shown below or as a non-drilled projecting sign. Each sign comes complete with two chrome fixings.

Please specify if you require a wall mounted or projecting sign. Contact our sales office for any bespoke requirement.

ATA4DP 210 x 297mm

Signsystems Arcline Desktop Signs

This stylish desktop sign can be used for both single and double sided display.

Paper inserts are placed between two silicone acrylic panels that sit atop a contemporary satin anodised aluminium extrusion.

All prices include two printed inserts.

DSSA6P 148 x 105mm
DSSA5P 210 x 148mm
DSSA4L 297 x 210mm

Ultimate Flexibility

One of the most noticeable developments in signing in recent years has been the increase in popularity of paper insert systems.

Traditionally if a sign needed updating a replacement part or new sign would have to be ordered from a sign company with the associated cost and delay that this would entail.

By using interchangeable inserts, updates can now be supplied at much shorter notice and at minimum cost.

To maximise this criteria, signsystems have developed a family of sign types which meet the demands of a fast changing environment, whether a lobby directory, desk or door sign.

All the signsystems products have interchangeable sign faces.

We are experts in project management, our fully trained staff will be able to advise on design, location and installation of all your sign requirements, no matter how small or large a project.

Artemis is the most flexible and adaptable sign system on the market and one of the best designed. Available in a wide range of sizes from A6 to A1, the flat face accepts most type of panel whilst the comprehensive range of fixing options includes door, wall, suspended, projecting and free-standing fittings.

Please state the orientation (portrait or landscape) when ordering

code	size(mm)	double or single sided
ATA6	103 x 148	single
ATA5	148 x 210	single
ATA4	210 x 297	single
ATA3	297 x 420	single

Solarsign are designed for external use and available in wall mounted, post mounted and free-standing monolith options, they come complete with magnetic or felt backing boards. These solar cases are maintenance free using natural light to store power during the day, then at dusk the case is illuminated by movement giving 24hr visibility.

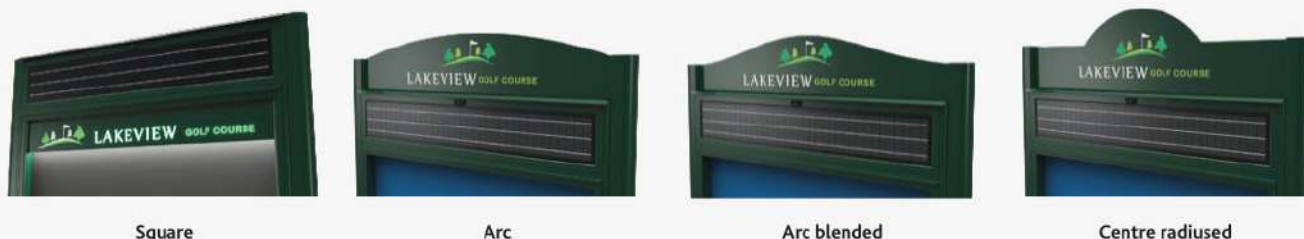

For further information contact our sales office for pricing and delivery options.

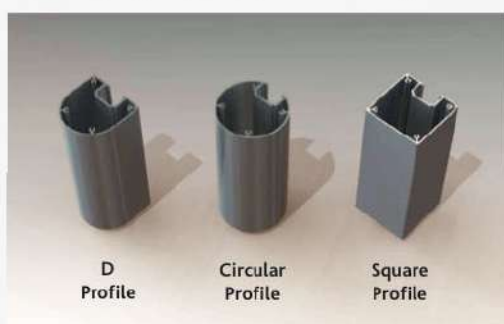

Employing an intelligent energy management system to maximise its on-demand illumination. LED illumination is triggered when low level of ambient light are combined with movement detection. Dual power units (solar and mains power) are also available where constant illumination is required.

This range of posters apply the safety message in a unique and innovative way.

We believe this range is the most complete, informative and eye catching available, easily understood but most importantly acted on.

These posters are encapsulated in tough wipe clean plastic for a longer life. All Making Sense of Safety posters are 600 x 800mm.

These posters are divided into four sections.

- The first section discusses how amazing and irreplaceable each of our senses are.
- The second looks at the various workplace risks associated with that sense.
- The third looks at how best to protect yourself from risk of accidents.
- The fourth covers the first aid procedures should the worst happen.

LA9 25mm x 66mm

Pipe Markers

The safety sign and signals regulations require the marking or labelling of pipes and storage areas containing dangerous substances. Areas of high risk include filling points, valves, appliances, drain outlets, vents, sampling points and all situations where employees are likely to become exposed to pipe contents.

EU Pipe Markers

The markers shown below can be manufactured in any of the colours above to comply to Safety Sign and Signals regulations. Choose colour and text of your choice.

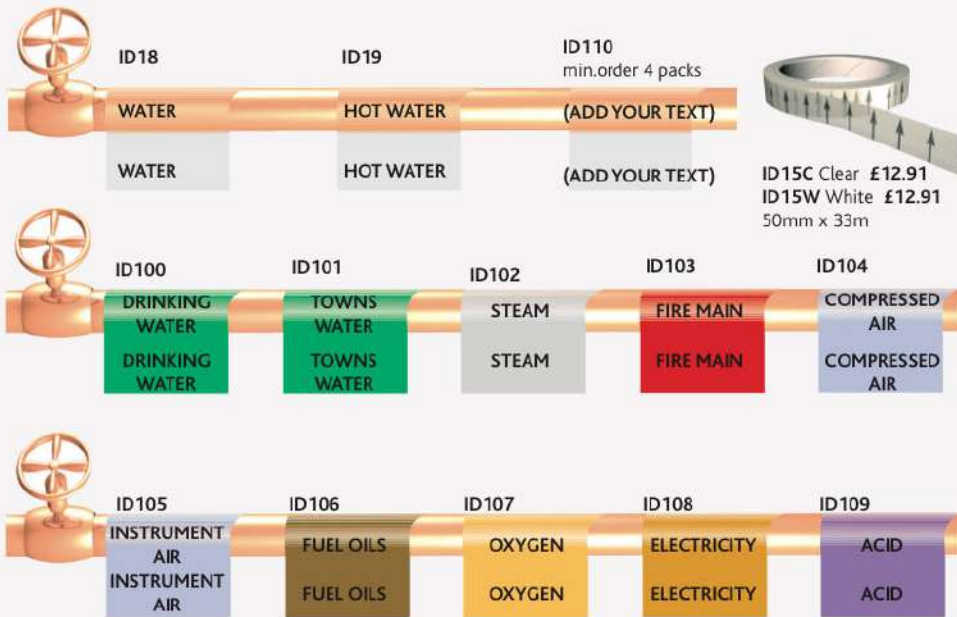

PM1 200 x 26mm (pack of 10)

PM2 284 x 37mm (pack of 5)

PM3 402 x 50mm (pack of 5)

British Standard Pipe Identification

Basic Identification Colours

Safety Reference Colours

Display Holders

Use these acrylic holders to compliment your own current scheme, as stand alone items, or use in conjunction with the action centres shown on page 61.

A4DISP
To accept 200 x 300

A5DISP
To accept 150 x 200

A4SS
Display holder will accept any 200 x 300 self adhesive sign.

A4PDISP
To accept 300 x 200

Bondings and Fixings

MAST1
Quick and simple to use, sign fix mastic will bond most dry, clean, grease and dust free surfaces without the need for mechanical fixings.

GUN1
Use with MAST1

PRIM1 (1 ltr)
Ideal for preparing most flat surfaces ensuring maximum adhesion.
As supplied with PRIM2

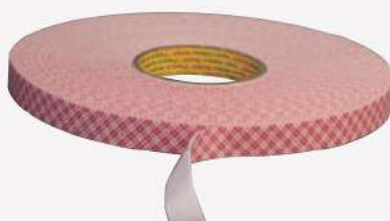

PRIM2
(preparation kit)
Ideal for preparing most flat surfaces ensuring maximum adhesion.

SC10
The above clip is ideal as a fixing method for temporary correx signs. Sign clips sold in packs of 10. Use in conjunction with zip ties.

PP10
Pressure pads ideal for interior fixing of safety signs to clean, dry surfaces. Supplied in strips of 10.

VHB1 (30m per roll)
High technology adhesive foam tape. Aggressive grip to flat, dry, clean areas.

NT2
380mm x 7.6mm
Zip-Ties sold in packs of 10.

Aisle Tiles

These self adhesive aisle tiles are ideal for use in warehouses, stores and any other applications where clear location marking may be required.

AT1
6 x 9.5mm (1/4" x 3/8")
168 per sheet
Minimum order 10 sheets.
available 0-9 and A-Z.

AT2
14 x 19mm (9/16" x 3/4")
36 per sheet
Minimum order 10 sheets.
available 0-9 and A-Z.

AT3
21 x 38mm (7/8" x 1 1/2")
12 per sheet
Minimum order 10 sheets.
available 0-9 and A-Z.

AT4
21 x 56mm (7/8" x 2 1/4")
12 per sheet
Minimum order 10 sheets.
available 0-9 and A-Z.

AG1
Graffiti remover
This highly versatile Thixotropic gel clings to any surface and can be used to rid surfaces of felt tip, ball point ink & most paints and crayons.

AG2
Label remover
This formulation is used for quick and efficient removal of self adhesive labels, stickers, etc, from a variety of surfaces, leaving no adhesive residue.

AG3
Degreaser
The powerful degreasing solvents in censolve ensure the quick and easy removal of grease, oil and contaminants. Non conductive, evaporates quickly leaving no residue.

Ceiling, Window and Wall Fixings

SKY 3A
(packs of 10)
Adhesive backed ceiling hooks
for bonding to clean, grease
and dust free ceiling areas.

SPRING1
(in pairs)
Versatile spring clips which
accommodate drops from
300mm to 1m.

SKY1 (4" in pairs)
SKY2 (8" in pairs)
Use to hang the suspended
frames shown above.

CEI 1A
(in pairs)
Strong field ceiling magnets will
attach to false ceiling support
frames.

SLIDE1
(packs of 10)
Plastic slides clip onto false
ceiling support frames.

WS1
(packs of 10)
Clear suckers for fixing posters
to any smooth surface such
as tiles or glass.

LOC10
(Pack of 4)
25mm Chrome locators.

LOC12
(pack of 4)
Budget locators.

SUS10
Suspension Kit complete
with 2m cable. Accepts up to
7mm material thickness.

PROJ3
For projecting our suspension
frames. Stiff spring action allows for
unwanted interference (Supplied
in pairs)

SEC22 (Pack of 4)
SEC23 (Pack of 100)
Anti tamper screws.

SEC26
Security screw drill bit.

SEC30 (Pack of 4)
SEC100 (Pack of 100)
White poly top screws.

PROJ22
(Singles)
Side projecting clamps.

Traffic Signs

The safety signs and signals regulations state that external traffic routes between buildings must be marked. In addition routes shared between vehicular traffic and pedestrians should be adequately segregated and signed. As of 1st January 2006 the revised class designations will be as follows: Under BSEN12899-1 2001 Class 1 becomes Class Ref 2 and Class 2 becomes Class Ref 1. Our range of traffic signs are available in 3mm aluminium with a Class 1 Ref BSEN 12899-1:2001 reflective face.

POST COLOUR
OPTIONS

Choosing the right fixing method is all important when choosing your signage requirements. From post mounted, to projecting signs or surface fixed to frame surround each option adds a different dimension to the finished scheme. Using the latest fabrication technology all types of fixing solutions can be undertaken to meet your exact requirements.

CAP1

Endcaps add a finishing touch to posts supplied separately.

POST1

76mm Traffic Post x 1.5 metre Grey, plastic coated steel for ultimate durability and good looks

POST2

76mm Traffic Post x 3 metre

POST 3

76mm Traffic Post x 3.6 metre

POST2.5

76mm Traffic Post x 2.5 metre

POST5

76mm Stainless Effect Post x 1.5 metre Adds a premier look to your external posts

POST6

76mm Stainless Effect Post x 3.0 metre

POST7

76mm Stainless Effect Post x 3.5 metre

Recommended depth of 400mm to be sunk into ground for POST1 or 600mm for POST 2 + 3.

BASE P1

Base plates for use in conjunction with traffic posts supplied separately.

Standard Post Clips 50mm

CLIPS1

2" clips supplied in pairs. Suitable for scaffold poles or existing railings and barriers.

Back to back clips

CLIPS2

Used in conjunction with 76mm posts when connecting two signs back to back.

Standard Post Clips 76mm

CLIPS3

3" clips supplied in pairs. Suitable for scaffold poles or existing railings and barriers.

CA1

Channel Adaptors supplied in pairs Allow sign to be fixed to any post / railing regardless of diameter, used in conjunction with steel banding.

BB1 Banding buckles per 100.

BB2 Banding tool.

Ensures a permanent fix for steel banding. Buckles are supplied in boxes of 100. The banding tool is used for fixing signs in conjunction with channel adaptors and banding.

BB3

100' x 13mm roll steel banding for use in conjunction with channel adaptor will accommodate any non standard support.

STRAP1 (pair)

STRAP2 (pack of 10)

Steel buckle straps will strap onto posts up to 150mm diameter. Easy tighten operation ideal when a full roll of banding is not required.

STRAP4 (600mm)

Screw banding will strap to oversized posts and tightens using a screw driver. Sold in pairs

Low index traffic and caution cones, ideal for hazard avoidance and for warning of potential dangers.

CO1 460mm
Ensure traffic hazards are noticed through using these temporary Hi-visibility traffic cones.

CO2 495mm
Help prevent slips, trips and falls by warning of potential hazards with these, easily stored, cleaning cones.

CO2A 495mm
Help prevent slips, trips and falls by warning of potential hazards with these, easily stored, cleaning cones.

CO14 750mm
This 750mm high reflective cone collapses to just 60mm high yet will remain stable in the most windy of conditions and only weighs 4Kg so will store and can be carried with ease.

CO2B 510mm
High-visibility No parking cones.

CO1A with text 510mm
Plain cone to accept factory applied message of your choice on each of the 3 sides
CO1B blank 510mm

BCP3 750mm
This cone is made to accept a cone converter, which allows planks to be inserted to form a barrier system.

Mirrors

Lightweight Rubber Cable Protectors

External cable protectors ideal for the protection of permanent or temporary cables on site.

- 3 division cable protector
- Suitable for foot or road traffic
- Time saver 'snap in' of the top cable
- 20mm diameter top hole
- Supplied in 10m rolls or 1m lengths
- Unique 'anti crush' simple to use product

RCP1 10 metre roll
RCP2 1 metre section

Heavy Duty Cable Protector

This instant cable protection is ideal for construction sites and outdoor events. The hinged lid allows for cables to be inserted once the ramp is in position. The robust design withstands HGV traffic. Can be laid as a permanent or temporary solution. Fixing bolts are provided.

With three channels (each 55mm x 65mm) a variety of cables can be accommodated.

RCP3 1000 x 600mm sections

10mph Rubber Speed Ramps

A tough and economic ramp system manufactured from recycled thermoplastic. 50mm high by 500mm wide sold in pairs (one black, one yellow) each pair forms 1 metre in length. Each pair comes complete with sufficient fixings.

- Tough and durable
- 10 mph control rating
- CATS EYES fitted as standard
- Any length of ramp can be formed
- Quickly installed and re-locatable
- Fixing bolts included with all ramp sections (specify type of ground)
- Two end sections can also make a circular speed bump

ECORAMP3

Each section 175mm wide.
Sold in pairs (1 Yellow and 1 Black)

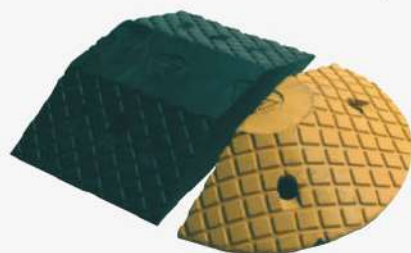

ECORAMP4

Each section 500mm long.
Sold in pairs (1 Yellow and 1 Black)

5mph Rubber Speed Ramps

A tough and economic ramp system manufactured from recycled thermoplastic. 50mm high by 500mm wide sold in pairs (one black, one yellow) each pair forms 1 metre in length. Each pair comes complete with sufficient fixings.

- Tough and durable
- 5 mph control rating
- CATS EYES fitted as standard
- Any length of ramp can be formed
- Quickly installed and re-locatable
- Fixing bolts included with all ramp sections (specify type of round)
- Two end sections can also make a circular speed bump

RAMP5(pair)

Each section 400mm long.
Sold in pairs (1 Yellow and 1 Black)

RAMPEND5 (pair)

Each section 200mm wide.
Sold in pairs (1 Yellow and 1 Black)

RAMP5A (pair)

Each section 500mm long.
Sold in pairs (1 Yellow and 1 Black)

Post Protectors

These heavy-duty, highly visible protectors are an ideal way to safeguard against accidental damage.

Supplied pre-drilled in pairs, complete with fixing bolts.
Can be used internally or externally.
800 x 100mm

WL14

Kerb Ramp

This tough rubber-moulded kerb ramp has a rise height of 100mm. (suits most kerbs).

Capable of all weights of vehicle.
490 x 305mm

KR100 (pack of two)

Parking Block

This moulded rubber parking block controls the position of parked vehicles.

It can be used individually, or aligned in longer runs.

Each block is half yellow and half black, and is 500 x 160mm.
Fixing bolts included.

PK100

Verge Posts

Highly reflective verge posts, ideal for restricting access, marking obstructions and direction of traffic.
1100mm high comes complete with a 360mm ground spike.
